

Product distribution

Applying Reinasan 24/7 Active Protection adds additional functionalities to the object/product, including permanent protection against air pollution and deterioration. It also provides source control of organic and atmospheric pollution. This extends the lifespan and helps reduce TCO on painting, cleaning and replacement. Applications for new parts as well as for renovation or restoration. Very suitable in combination with inhibitor treatments for concrete structures.

Addition

The protection and maintenance products have no negative effects on existing properties of the façades or material types. There is a 10-year guarantee on demonstrable performance and durability. Also through measurements and easy maintenance with environmentally friendly products, there is grip on total control.

Partner information

Reinasan works exclusively with partners. After a company successfully completes the training course, the trained employees are certified. This enables the partner to carry out assignments 100% independently carry out assignments. In this way, they can distinguish themselves by offering extra service and contribute to making our planet more sustainable and circular. Also, the system offers the partner the opportunity to generate more turnover.
