LabelSecure

BIZERBA

Visual label inspection: LabelSecure offers you a unique inspection performance for different products. The Vision inspection system checks labels for complete and correct information and intactness. As needed, LabelSecure is available for 100% control or for sampling.

More information
High performance with a wide range of solutions and options.

Product description

LabelSecure checks labels and their information at the top and/or bottom of packagings.

The Inline solution warns users in the event of errors or production problems by means of an alarm allowing them to solve a problem immediately. As regards LabelSecure S, the solution for sampling, users have to solve detected errors before being able to start another lot.

LabelSecure prevents extensive rework on non-conforming packagings as well as claims and product recalls due to incorrect labeling. This ensures that only flawless products reach the market. Furthermore, products can be fully tracked since all images recorded during production are archived. The monitoring of the packaging process is ensured by quality reports which are prepared on a regular basis.

LabelSecure is compatible with numerous packaging types and can be used for a great number of inspection tasks.

Packaging example

Highlights

- Hygienic design and time-saving cleaning
- Software for complete tracking of all products: Saving of images incl. date and time, counter, production and machine logbook
- Safe and easy operation:
 - Intuitive user interface with color touch screen
 - Offline parameter-setting allows manual adjustment of parameters based on saved images on the device or PC
- Prevents incorrectly labeled packages in retail
- Suitable for many packaging types

Inline versions:

- Touchless and non-destructive quality control of labels
- Can be easily integrated in existing production lines, max. 2 m incl. rejection
- Modular design to allow integration of a broad spectrum of sensors that match inspection requirements
- Suitable for packaging lines with automatic product change
- Automatic rejection of packages not conforming with reference criteria
- Upgradeable for future requirements

Packaging example

Options

- Two-lane version
- With simple or dual rejection unit
- Mechanical pusher or air jet nozzle
- Lockable reject bin
- IP66 protection
- Air conditioning
- Robot control
- Mobile work table (LabelSecure S)

My Bizerba

We offer you solutions from a single source which can be customized and allow you to respond to any change in a flexible manner. Benefit from costs which can be planned and efficient processes. We are happy to advise you.
