The Company

INNOVATIVE • FLEXIBLE • RELIABLE

Teckentrup was founded in 1932 and is today one of the largest door manufacturers in Europe with production plants in Verl-Sürenheide (administrative HQ) and Grosszöberitz.

- 15 subsidiaries in Germany and numerous representatives and partners throughout Europe and overseas, help to create a global infrastructure and fulfil all the demands of flexibility and local presence.
- From the idea to innovation, from the concept to practical implementation, everything occurs under "one roof".
- The entire product range is produced in the Teckentrup production plants and supplied from one source.
- Highly motivated and qualified employees, state-of-the-art technologies and computer-controlled production systems guarantee continued progress and success.
- First class materials, precise processing and systematic quality tests in accordance with DIN EN ISO 9001 ensure that our customers receive innovative trademark products with a high return on investment and a long service life.

Your Competent Partner

FOR TOP PRODUCTS AND TOP SERVICE

Teckentrup doors made of steel, stainless steel and aluminium combine high-level innovative product technology with design diversity. They provide the perfect solution for each and every requirement, even for highly complex tasks:

- For industry, business and private customers
- For new and renovated buildings
- In accordance with the latest EN safety regulations

We support our partners from the planning phase right up to final acceptance and maintenance with the aid of an extensive service package:

- ✓ Project planning support
- ✓ Rapid and efficient offer and order processing
- ✓ Measuring and tendering assistance
- ✓ Competent on-site advice service
- ✓ Deadline-driven and object-related delivery (according to agreements)
- ✓ Product and assembly training courses for sales staff and installers
