

ATS Electro-Lube International Inc.

Market leading automatic lubrication systems for industrial applications.

ATS Electro-Lube has led the automatic lubrication market for 35 years. Since the release of the world's first intrinsically safe automatic lubricator in 1982 – the Electro-Luber™ - we have been the driving force of innovation within the lubrication sector.

Today, the Electro-Luber™ remains the benchmark by which lubrication equipment is measured. It is the most reliable automatic lubricator on the market by some distance, and it is ATS Electro-Lube's quality that has made the company so successful.

As well as reliability, ATS lubrication products lead the market in power, safety, operating temperature range, and durability.

ATS Electro-Lube's philosophy has always been to solve maintenance issues for our customers. This began with the creation of a lubricator safe for any environment, even explosive zones, to ensure the safety of maintenance operatives. We continue to strive for solutions to the most challenging industrial lubrication problems.

Customer satisfaction is at the heart of all our designs, so user-friendliness and long-term economy is absolutely crucial in all our systems. Our multi-point lubrication units are all refillable, and last hundreds of uses. They are without doubt the most durable systems available, performing in even the toughest conditions.

The Electro-Luber™ – the most reliable automatic lubricator on the market is a single point system, waterproof to 10m depths, ATEX certified, and capable of operating at -40°C.

The Ultimate Luber™ – highest pressure of any automatic lubricator, over 100 bar. Refillable on site, feeds up to 12 lubrication points or bearings.

The Jack Luber™ – versatile and durable lubricator, refillable, and the most economical solution to multi-point applications available. Temperature range -40°C to + 60°C.

Titan Cartridge Luber™ – Generates 100 bar pressure, uses standard 400g grease cartridge for fast refilling, with level sensor. Multi-point convenience for long-term economy.

Titan Oiler™ – 200 bar pressure makes the Oiler the most powerful automatic oil lubricator available. 1.4L capacity, low level sensor, feed up to 12 points. Excellent for chain applications.

Suitable for hundreds of industrial applications, including....

bearings - chains - mining machinery - food processing – gear boxes – generators – automotive industry – wind turbines – oil & gas – offshore – rail – lifting equipment – water treatment plants

Electro-Luber™

Reliable single point lubrication

Jack Luber™

Versatile & economical

Ultimate Luber™

Powerful single or multi-point

Titan CL™

Convenient & long-lasting

Titan Oiler™
