

Industrial 3D printers and parts

voxeljet's innovative 3D printers:

INDUSTRIAL, EFFICIENT, RELIABLE

voxeljet SYSTEMS focuses on the development, production and distribution of fast and high throughput 3D printing systems. Today, voxeljet offers a full range of machine platform sizes, from smaller entry-level models to large-format machines, offering the perfect 3D printing system for diverse application areas. The printers combine durability with reliability even under the harshest industrial conditions.

FEATURES

- Large Builds: build boxes up to 4,000 x 2,000 x 1,000 mm*
- High throughput: volumetric output rates of up to 123 liters per hour
- Reliability: industrial 3D printers for 24/7 usage
- Flexibility: open source part build systems supporting a variety of material sets

* depending on build height

Your partner for digital production:

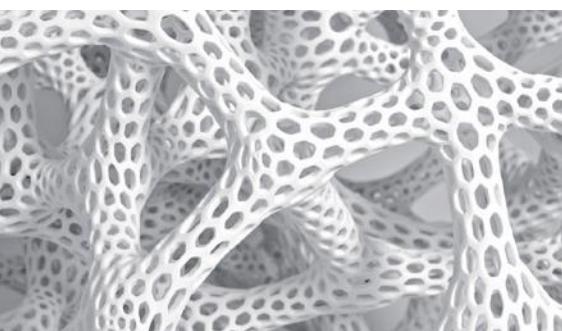

FLEXIBLE, FAST AND CUSTOMER ORIENTED SERVICES

voxeljet SERVICES creates parts, molds, cores and models for a variety of industrial and commercial customers based on designs produced using 3D CAD software. We help our customers move from the design to the production stage by assisting them in developing optimal designs in a variety of materials for their production needs. Small-batch and prototype manufacturers benefit from the automatic, patternless manufacture of their cast parts and 3D models.

FEATURES

- Volume: large-volume models of up to 4,000 x 2,000 x 1,000 mm*
 - Economy: on-demand production saves time and money
 - Flexibility: a few large parts or many small parts in a single build box
 - Materials: digitally produced alternatives to traditional sand and investment casting materials
 - Complexity: geometries of any complexity
- *depending on build height

voxeljet
SERVICES

voxeljet – industrial 3D printers and parts

voxeljet is a leading manufacturer of industrial 3D printing systems and offers printing services for the on-demand production of molds and models for metal casting.

voxeljet believes that new technologies and materials are transforming how products are developed and manufactured. voxeljet's technology and products stand at the leading edge of the drive towards the industrialization of additive manufacturing.

We serve industrial and commercial customers in a variety of markets:

- automotive and aerospace
- film and entertainment
- art and architecture
- engineering
- education and medical
