

# KOLLER INTERNATIONAL GROUP

Momentum for success

[www.rkoller.com](http://www.rkoller.com)

**KOLLER** *INTERNATIONAL  
GROUP*

## **A keen sense of innovation – for generations!**

Our success story started with an innovation that revolutionized the whirlpool market at that time. The use of whirlpool technology in bathtubs and the decision to employ brass as a quality material for manufacturing component parts – these two steps were the beginning of a great future.

### **Four decades on a winning track**

Almost 40 years later, the Koller International Group has become a globally operating group of companies who has established itself in the past decades as an innovative partner, also in other segments. We tackle our tasks with the necessary experience and a lot of ingenuity. This is how we achieve the best possible result for our customers.

### **The best employees and machines**

"A company is only as good as its employees." Isn't that the truth! Our experts and our state-of-the-art machinery are the basis for our success and will continue to provide for innovative solutions in all our business segments.

Yours, the Koller Executive Team

Rudolf Koller

Karin Drucker

Bernhard Koller

# MOMENTUM FOR SUCCESS

# KOLLER INTERNATIONAL GROUP

As an enterprise with Austrian roots, the Koller International Group successfully operates on an international scale and stands for innovative spirit, comprehensive technical know-how, and cutting-edge production facilities, exclusively inside the EU.

## **KOLLER** WHIRL- SYSTEMS

Innovative systems and individual components for whirlpool tubs, spa whirlpools and showers, powerful pumps, as well as products for water revitalization and bath additives.

## **KOLLER** METALL- & KUNST- STOFFTECHNIK

Flexible, quick, and uncomplicated – high-quality brass, sheet metal, as well as plastic parts and tools are developed and manufactured to your wishes.

## **KOLLER** HOLZ- & BAUMARKT

In Vienna and Vitis we offer an extensive range of timber products both for business and private customers. At the regional hardware store in Vitis we sell products for house building, gardening, agriculture, cars, and much more.

A dynamic splash of clear blue water against a light blue background, with water droplets and bubbles visible. The splash is horizontal, moving from left to right across the middle of the page.

# INGENUITY FOR LEAD

## **Four decades of leadership in water technology**

Koller Whirl-Systems looks back on many years of history which have been marked by innovations since 1978. You can rely on high-grade components from the market leader and a perfectly trained team of experts finding the best possible solutions for your requirements, now and in future.

**[whirl.rkoller.com](http://whirl.rkoller.com)**

**Strong points in favour of Koller Whirl-Systems:**

- We are a reliable partner from concept design to series maturity and production.
- We develop components exactly to your ideas.
- We have more than 750 product certificates.
- We operate via an international sales network.
- We produce all products on our own and exclusively inside the EU.
- We score with quick delivery times and a life-time guarantee on the availability of spare parts.
- We set great store by components that are easy to install.
- We excel due to our innovations for whirlpool systems.

# KOLLER WHIRL-SYSTEMS

SOLUTIONS FROM THE INNOVATION AND QUALITY LEADER

## Systems for whirlpool tubs

The development and manufacture of individual components and complete systems for whirlpool tubs is the core competence of Koller Whirl-Systems. Our pump, nozzle and lighting systems can be easily adapted to your wishes, can be combined individually, and are easy to maintain and install.

## Systems for spa whirlpools

Apart from our expertise for whirlpool tubs, we set new standards also in terms of spa whirlpools. Our high-grade components from among our extensive range of products are the perfect complement for your system – from high-capacity pump technology to the right illumination.

## Shower components

Optimal and permanent functionality as well as ease of installation of the different components take showers to a new quality level. The products offered by Koller can be perfectly combined with each shower system and are available in brass, stainless steel, and plastic.

Koller Whirl-Systems is an innovative manufacturer offering a wide product portfolio. As a reliable partner, our word is our bond. We accommodate to your wishes in every respect, guarantee the perfect functioning of our products and score with quick delivery times. If you need a spare part urgently, we can draw on our big inventory. Additionally, we offer comprehensive installation services and integrate our components into your whirlpool tubs and spa whirlpools.

#### **Koller Milk System**

This innovation refines the water and can be combined with all common whirlpool systems. Through a special high-pressure pump and a generator producing the required milk effect, the oxygen content of the 100% pure water is increased – without any additives. This optimally moisturizes the skin and prevents it from drying.

#### **Koller Aqua Active – revitalized water**

The new way of water treatment makes ordinary tap water as valuable as natural spring water. By simply screwing the devices developed by Koller onto the water tapping points, the water is swirled and vitalized while flowing through the tap. This innovation is very versatile and can be used in baths, households, gardens, service connections / heating systems.

#### **Relaxan® fragrance products**

The special perfume oils and herbal extracts have been specifically designed to be used in whirlpool tubs, saunas, or steam baths. Due to the high concentration of fragrance, the products are very economical in use and create a pleasant scent.

# LOVE FOR PRECISION

## **Metal and plastics technology for sectors with special requirements**

Koller Metal and Plastics Technology (Koller Metall- und Kunststofftechnik) is a business segment of the Koller International Group - with long years of experience and an excellent reputation. For the precise manufacture of components we combine Austrian know-how with an efficient and economical production. We produce components that meet your requirements and, into the bargain, make your processes more efficient. The precision and quality of Koller Metal and Plastics Technology is appreciated by customers from all lines of business.

**[metall-kunststoff.rkoller.com](http://metall-kunststoff.rkoller.com)**

Due to our advanced facilities and our comprehensive know-how we are able to deliver the perfect metal and plastics technology for each industry – we'll be happy to advise you.

# KOLLER METAL AND PLASTICS TECHN

PRECISELY WHAT OUR CUSTOMERS WANT

## High-precision metalworking

With decades of experience in metalworking, a comprehensive know-how and modern machinery we fabricate components precisely to your wishes.

### CNC production

Cutting-edge computer-controlled metalworking for exactly turned and milled components.

## Surface technology for a perfect finish

Our requirements on the surfaces of our components for whirlpool systems are high – and we meet the same requirements for the parts of our customers. Our processes comply with the latest environmental directives. A broad range of services for surface treatment and finishing makes us special.

### Ultramodern electroplating facility

Corrosion protection through coating with bright nickel and nickel-chromium.

## Development and manufacture of plastic parts

With profound knowledge and the necessary experience, we support our customers in terms of product development and contribute our production know-how. We respond to your requirements and are also able to produce minimal quantities.

### Plastic injection moulded parts

Made of PVC, PP, PA, ABS, as well as other thermoplastics, and produced by means of machinery from Engel.

### Plastics production

Top quality for your requirements

### Toolmaking

For the production of precisely tailored plastic parts.

# LOGY

## Sheet metal working

Semi and fully automatic stamping, bending and cutting – using different processes.

## Soldered and welded connections

Reliable connections, even in case of high temperatures or other extreme external conditions.

## Laser technology

Latest laser technology permits the permanent marking of your components – whether chromium, nickel, or plastic parts.

## Assembly

In-house assembly of whirlpool components in bathtubs and spas – technically harmonized to perfection.

## Polishing, grinding and brushing

With an automatic COSMAP machine and robot technology we utilize the latest technology.

## Paint shop

State-of-the-art paint shop for best surface quality and other technical requirements.

## Electronic modules for individual demands

Our electronics production is quick, reliable and – most importantly – flexible! As a reliable partner, we provide comprehensive support and produce your electronic modules and devices exactly to your specifications.

## Printed circuit board assembly

Using SMD and THD technology, soldering is effected by means of an ultramodern selective soldering machine; compliance with international standards such as RoHS and safety standards like EN60335 is ensured.

## Cable manufacture

Semi automated manufacture of prefabricated cables with the appropriate applications.

## Device assembly

Assembly of components and subassemblies according to your specifications; function and safety testing, e.g. to EN60335 and/or EN50106.

## **A timber and building partner for any eventuality**

The timber trade is an important mainstay of the Koller International Group. At the principal locations in Vienna and Vitis a wide range of products made of wood is available. In Vienna, a timber and fuel store covering an area of 6000m<sup>2</sup> is used by building companies and private customers alike.

**[holz.rkoller.com](http://holz.rkoller.com)**

### **Koller Holz for business customers**

We foster long-standing partnerships with numerous customers from the construction industry. Our structural timber portfolio includes a wide range from shuttering panels to square timber and is always delivered on time.

### **Koller Holz for private customers**

In Vienna and Vitis we offer our customers timber in various dimensions as well as a wide range of premium firewood.

# RELIABILITY FOR PARTNERSHIPS

## **Your regionally rooted hardware store**

DIY makes you happy – and we have the right products for you. Our employees are perfectly trained and skilled in various fields so handymen always get what they need – at very advantageous prices. Being a regional provisioner, we offer products for house building, gardening, agriculture, cars, and much more. We are looking forward to your visit at our hardware store in Vitis!

# ALWAYS CLOSE TO THE CUSTOMER

Founded in Austria, the centre of the Koller International Group is still located in the region: The group is managed and represented externally from the group's headquarters in Vienna. Research and development, as well as production by means of top modern machinery is split among two locations in the EU:

## **Headquarters Vienna / Austria**

From Vienna, the national and worldwide activities of the Koller International Group are planned and coordinated.

## **Parent plant Vitis / Austria**

Competence centre for development, metalworking, surface technology, and electronics.

## **Plant Jindrichuv Hradec / Czech Republic**

Competence centre for blower and pump production, assembly, toolmaking and plastics production.
