AEROSPACE & DEFENSE COMPONENTS

“ The aircraft industry has always been linked with high precision, reliability and advanced technology. We have been involved in the aircraft industry for many years including civil, military and aerospace areas. To best meet the requirements of this market, our company is certified in accordance with ISO EN 9120. The trust of our customers is our priority: it reflects the quality & reliability we bring to our products. Quality, optimized materials and costs, traceability and supply chain management are SADEVTEQ’s key factors to serve the aerospace & defense industry. ”

— Annick Christmann, Sales

Volumes

From 50 pieces.

Parts

Gear pins, Guide shafts, Spindles, Valve bodies, Sensor parts, Actuators, Hinges, Bushings, Housings, Clamps, Pans, Coupling parts, Elbows, Screws, Sleeves, Manifolds, Splined shafts, Fitting parts, Collets, Pins, Plugs, Rotors, Gears...

Raw material

Stainless steels, structural & heat treated steels, Hastelloy, Aluminum, Titanium, Nickel based, Bronze, Inconel...

Process

CNC multi-axis machines, Milling centers, Castings, Assembly...

Finish and plating

Grinding, painting and coating (zinc, nickel, silver & gold platings), cadmium plating, hard chrome plating, anodizing...

Diameters

Round Bars to Ø 80 mm (3.15")
Slugs to Ø 120 mm (4.72").

Volumes

À partir de 50 pièces.

Pièces

Epingles de roulement, flasques, axes de guidage, bossages, clapets, capteurs, corps de bobine, férules, brides, vis imperdables, axes taillés, bouchons, bornes, carcasses, grilles...

Matières

Aciers inoxydables, aciers réfractaires, alliages d'aluminium, titane, bronze, bases nickel, inconel...

Process

Tours CN mono broches, tours CN, bi-broches bi tourelles, centres d'usage, découpe, assemblage...

Finition et traitement

Ebavurages fins, rectifications, peintures, argentures, zingages, nickelages, chromages, alodines, anodisations, BF5...

Diamètres

Jusqu'à Ø 80mm en barres et Ø120mm en lons.

Mengen

Ab 50 Stück.

Teile

Führungsachsen, Lagernadeln, Zapfen, Sensoren, Ventil-Klappen, Spulenkörper, Druckhülsen, unverlierbare Muttern, Gehäuse, Verschlusskappen, Grundplatten, Gitter, Stöpsel, Verbindungsstücke, Kugeln, Flansche und Sonderflansche, Wellen, Achsen, Spindeln, Ventile und Armaturen, Sitzringe, Schrauben, Steckscheiben...

Werkstoff

Edelstahl, gehärteter Stahl, Aluminiumlegierungen, Titan, Inconel, Nickelhaltige Legierungen, Bronze...

Prozess

CNC, Zwei-Spindler, Drehwerkzeughalter (Revolversystem), Bearbeitungszentren, Stanzen, Montage...

Oberflächenbehandlung

Entgraten, Gleitschleifen, Färben, Veredelung (Zink, Nickel, Silber, Alodine)...

Durchmesser

Bis Ø 80 mm Stangenmaterial / Bis Ø 120 mm Stangenabschnitte.

✔ **Multilingual team with international experience**

✔ **Responsiveness and reliability**

✔ **Logistics platform with important storage capability**

✔ **In-house inspection and quality department**
