The formulations of the NUTRIEL family are foliar fertilizers with high purity and solubility and developed to have quick absorption. The specific NPK ratios have been studied to provide a balanced nutrition to crops in different phenological phases. In addition to nitrogen, phosphorus and potassium, the NUTRIEL formulations are enriched with the micro elements required to prevent any micro-deficiencies and contribute to the harmonious development of all crops.

DOSAGE AND METHODS OF USE	CROPS	APPLICATION	DOSE
<b>FOLIAR</b>	Fruit/Vine Horticultural Floricultural Industrial	2-4 Throughout the cycle for fertigation	200 - 250 g/100L

Warnings: For any mixtures with other products, make preliminary tests. Observe the dosages shown. Store the product in properly ventilated areas.

### FORMULATION

Soluble microcrystals
