## SISTO-C Diaphragm valves for sterile applications

### Applications:

Hygienic and sterile handling of fluids in the food, beverage and pharmaceutical industries

### Further information:

Form area for contact information, consisting of a large empty rectangular box with corner brackets.

# SISTO-C Diaphragm valves for sterile applications

- Maximum service life and pressure limit (PN16)**  
 thanks to enclosed and spiral-supported diaphragm;  
 operating pressure up to 20bar
- Simplified installation and control of the drain angle**  
 Self-drained; drain angle indicated by laser marking
- Optimum conditions for fluid purity**  
 due to valve hydraulics without dead volume
- High energy efficiency**  
 Lower pressure losses thanks to optimized flow profile

- Excellent functional reliability**  
 The floating diaphragm suspension prevents  
 damages of the diaphragm
- Reliable Operation**  
 The stem and all internal operating elements  
 are not in contact with the fluid
- Reliable sealing to atmosphere and absolutely tight shut-off**  
 The diaphragm provides hermetic sealing

## Materials

Body	1.4435 ; 1.4539 and different Hastelloy qualities
Bonnet	1.4409
Diaphragm	EPDM, TFM-bonded, TFM/EPDM 2-pieces
