

## FEED SPECIALITIES

### WHY CUBES?

#### CUBES ARE A SPECIALITY

For quite some time there is a trend to use the small and medium KAHL flat die pelleting presses for speciality feed, mainly for the production of special shapes in premium quality (cloverleaf, square, floral shape etc.).

The profit margin is exceptionally high in this segment. Many of our customers want to expand this segment.

Only with the KAHL flat die pelleting press, it is possible to produce these long, large special shapes in premium quality for horses, cattle and goats.

Other specialities: Fish feed, petfood and other niche products.

#### ADVANTAGES

- Premium quality
- High profit
- Reduced investment costs
- Due to the simple and fast die change, cylindrical and cubical pellets or fibres can be produced with only one machine
- Different shapes and diameters are possible
- Utmost flexibility – production of a new product by simply changing the die
- Fast reaction to changes of demand on the market
- Reduced wear thanks to the sandwich principle of the die and the low roller speed (2.5 m/s)
- Minimum energy consumption
- Low space requirement
- Depending on the pellet shape, fibre lengths of 40 to 100 mm can be processed
